

# Valencia/Kolb Intersection Improvement Plan Open House Comments:

February 27, 2013  
Pima Air & Space Museum  
5 p.m. to 7 p.m.

- Concern about maintaining full access for turning movements at Old Vail/Kolb intersection
- Very informative. Looking forward to both projects to start. Jeff and Jim were helpful and explained everything very well
- Very good display and support
- The Open House is great. Thank you. I am in complete agreement in the engineering and plan.
- am in total favor of this intersection being improved- I travel it everyday and it is a nightmare and bottleneck leaving Rita Ranch and returning to RR. The R hand turn from Valencia to Kolb is horrible and backs up for 50 cars during 715-800 and the L turn from Kolb to Valencia on my way home to RR backs up from 430-600 all the way back to the second bridge by Davis Monthan . We need 2 turn lanes on all four directions please.
